About AEI

AEI matches volunteers with animal organizations around the world that need skilled and reliable help. All of our placement partners work directly with animals, addressing health and conservation issues specific to their country. Placements include wildlife hospitals, sanctuaries, neuter-spay-vaccination clinics and conservation projects. AEI is proud to support the important work of our partners.

Veterinary Technicians

Volunteer your skills and make a real difference in the world. Veterinary Technicians have the knowledge and skills that animal organizations need. This is an excellent opportunity to work with different species, try new procedures and learn more about husbandry, nutrition, conservation issues and more. Try something different, or launch an exciting career, while travelling to places you have always wanted to visit. You don't have to be a Veterinary Technician to volunteer—bring along a friend, family member or spouse to volunteer with you!

Veterinary Technician Students

AEI Experiences are a great opportunity for Vet Tech students. Volunteering with animals lets you expand your knowledge, gain practical skills and make important connections. Get out of the classroom and try something new and exciting!

Animal Experiences

At AEI we aim to provide quality, worry-free placements. Animal Experiences include airport pick-up on arrival, housing, meals, on-site training, travel insurance, AEI Travel Manual and emergency support while away. We strive to offer you the lowest price possible and the experience that is right for you. Let AEI take care of the details so that you can take care of the animals!
